

TECHNOVANZA

Taking Technology To Society

VJTI Presents

TECHNOVANZA

2020-21

SMART CITY

“The city is a fact in nature, like a cave, a run of mackerel, or an antheap. But it is also a conscious work of art and it holds within its communal framework many simpler and more personal forms of art. Mind takes form in the city and in turn urbans form condition mind.”

–Lewis Mumford

“Smart” describes to the city’s ability to create well-being for its citizens. A smart city is a city that uses technology to provide services and solve city problems. A smart city does things like improve transportation and accessibility, improve social services, promote sustainability, and give its citizens a voice. The main goals of a smart city are to improve policy efficiency, reduce waste and inconvenience, improve social and economic quality, and maximize social inclusion.

So if you think you have what it takes to make world just a bit better,, we at TECHNOVANZA 2020-21 invite you to come and play to win in making your ideas stem into the real world and plan your very own **SMART CITY**.

Rounds:
