TECHNOVANZA

Taking Technology To Society

E-PORTFOLIO CONTEST

Introduction:

In today's day and age, there is a website for everything, helping us find information on anything we want. Now imagine a website showcasing your progress, talents, skills and accomplishments. That's exactly what an E-Portfolio does.

An E-Portfolio is a digital collection of your work and achievements- a record that acts as your brand on the internet. While an E-Portfolio can be used for a variety of purposes, here we will look at it in a professional angle.

Objective:

Participants are required to create an e-portfolio i.e. a website which can act as a potential technical resume which includes-

1) A small description of themselves
2) Their academic career
3) Skills and achievements
4) Projects undertaken
5) Courses completed
6) Contact details

Participants can add on anymore subsections to make a PROFESSIONAL, COHERENT website.

***NOTE**- Evaluation will NOT be done on whether the information provided is valid or not. Only relevance of it will be considered.

Key Points:

1) The website should be made using only HTML, CSS and JAVASCRIPT.
2) They are required to send the link of
- the website AND
- video of the website running on both a computer and a mobile device. (screen recording)

Evaluation:

Participants will be evaluated on the following criteria-

1) Designing aesthetics of the website
2) Syntax and semantics of the code.
3) Loading time of website
4) Readability of content
5) Relevance of information
6) Usability in different browsers and on desktop/mobile interfaces
7) Ease of navigation within website

Note:

1. No follow-up arguments with the organizers will be tolerated.
2. Work once submitted is final; no resubmissions are allowed.
3. Decisions made by the organisers are final.
